BALANCE OF PAYMENTS, INTERNATIONAL INVESTMENT POSITION AND EXTERNAL DEBT OF THE RUSSIAN FEDERATION IN 2021

In 2021, the balance of payments of the Russian Federation was formed amid favourable global price conditions for key commodities. The current account strengthened considerably driven by the increase in exports of goods exceeding the growth in imports.

Net lending to the rest of the world was in the form of the expansion of foreign assets of the economy.

The drop in the net international investment position of the Russian Federation mainly resulted from positive revaluations, which made foreign liabilities increase more than foreign assets.

During 2021, the external debt of the Russian Federation rose primarily due to the allocation of SDR holdings to the Russian Federation.

BALANCE OF PAYMENTS OF THE RUSSIAN FEDERATION

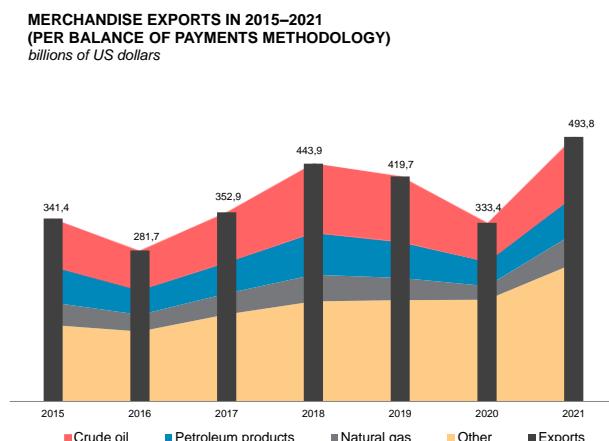

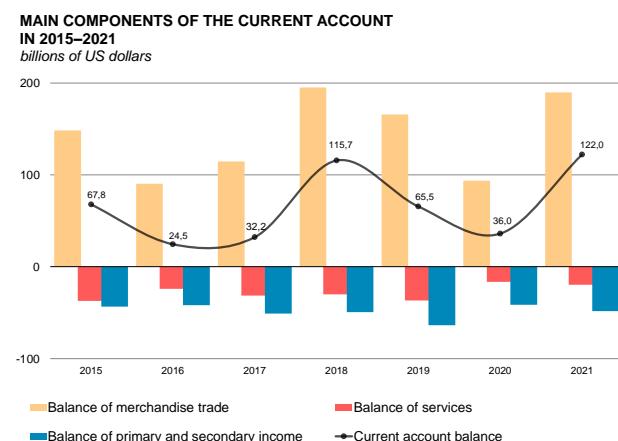

The surplus in **current account** for 2021 increased by \$86.0 billion to \$122.0 billion following the strengthening trade balance surplus partially offset by wider deficit of other current account components.

The surplus in the **trade balance** rose from \$93.7 billion in 2020 to \$189.8 billion in 2021.

Exports of goods amounted to \$493.8 billion and exceeded the 2020 figure by \$160.4 billion. This change was driven by higher values

of supplies of both key fuel and energy commodities and non-energy products. The composite export deflator index equalled 1.45, whereas for main fuel and energy commodities it was 1.64. The overall volume of exports of goods was up by 1.9% in physical terms, with a 1.0% reduction in the volume of key fuel and energy commodities supplies.

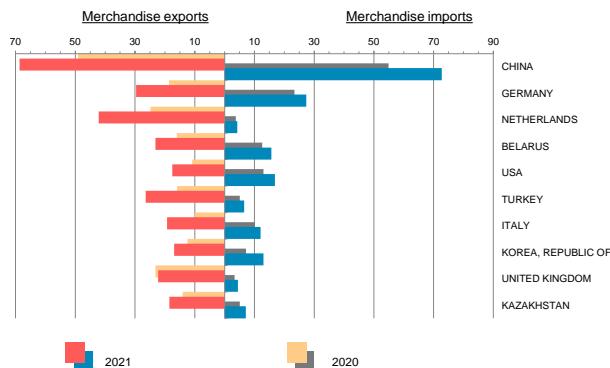

Exports were up across the majority of main commodity groups. Mineral products supplies grew most significantly, specifically by

60.0% to \$276.5 billion. As a result, the share of this commodity group went up by 4.9 percentage points to 56.2%. Exports of ferrous and non-ferrous metals, including articles thereof, increased by 46.3% to \$51.1 billion, with their share amounting to 10.4% against 10.3% a year earlier. The value of exported chemicals increased by 58.2% compared to 2020 to reach \$37.9 billion, with the share of such products rising to 7.7% from 7.1%. Exports of foodstuffs and agricultural raw materials expanded to \$36.0 billion, or by 21.6%. The share of this commodity group was down by 1.5 percentage points to 7.3%. Exports of machinery, equipment and transport means in the amount of \$32.7 billion exceeded the previous year figure by 30.1%, with the share of this commodity group declining to 6.6% from 7.4% a year ago.

In the geographical structure of exports, the EU share rose by 4.1 percentage points to 38.2% in part due to the increase in values of raw hydrocarbons exports. On the contrary, the share of exports to the Asia-Pacific Economic Cooperation (APEC) countries decreased to 26.6% (from 27.9% in 2020); the share of exports to the Eurasian Economic Union (EAEU) countries declined to 9.3% (from 9.8%

COUNTRIES – RUSSIA'S MAJOR TRADING PARTNERS
billions of US dollars

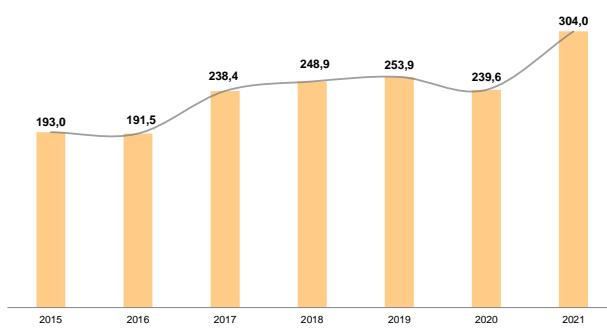

in 2020); the share of other countries went down to 25.9% from 28.2% in 2020. The largest exports went to China (14.0%), the Netherlands (8.6%), Germany (6.0%), Turkey (5.4%), and Belarus (4.7%).

Imports of goods in 2021 rose to \$304.0 billion, or by 26.9%, compared to 2020. Imports rose by 17.2% in physical terms, with a 8.3% pick-up in prices.

The value of the most significant group of goods – machinery, equipment and transport means – increased by 31.0% to \$144.5 billion fuelled by the ongoing recovery of domestic demand; the share of these goods in overall imports edged up by 1.6 percentage points to 49.2%. Imports of chemicals and products of the related industries expanded by 26.9% to \$53.8 billion, with the share of the group standing at 18.3%. Imports of foodstuffs and agricultural raw materials totalled \$34.0 billion, which is 14.4% more than in 2020, with the share of this group accounting for 11.6% (12.8% in 2020).

In the geographical structure of imports of goods, the EU share went down to 32.0% from 34.0% a year earlier. However, the shares of APEC and EAEU in the total imports were up to 44.7% (42.4%) and to 8.1% (8.0%), respectively. Other countries accounted for

MERCHANDISE IMPORTS IN 2015–2021
(PER BALANCE OF PAYMENTS METHODOLOGY)
billions of US dollars

15.2% (15.6%). The top Russia's counterparts were China (24.8%), Germany (9.3%), the USA (5.7%), Belarus (5.3%), and the Republic of Korea (4.4%).

The deficit in the **balance of foreign trade in services** increased to \$19.5 billion from \$17.0 billion in 2020 owing to a faster growth in imports of services.

Exports of services amounted to \$56.0 billion, which is \$7.9 billion more than last year. The value of transport services provided to non-residents expanded by 14.0% to \$18.3 billion primarily owing to a larger freight transportation. Exports of services under the 'Travel' item recorded minimum growth of 2.6% amounting to \$4.0 billion due to the anti-pandemic measures restricting the entrance of foreigners to Russia taken by the Russian Government. The value of other services provided to non-residents gained 19.6% amounting to \$33.6 billion as compared to \$28.1 billion in 2020. The major contributors to growth in exports of other services were telecommunication, computer and information services, construction and other business services to non-residents.

Imports of services grew to \$75.5 billion,

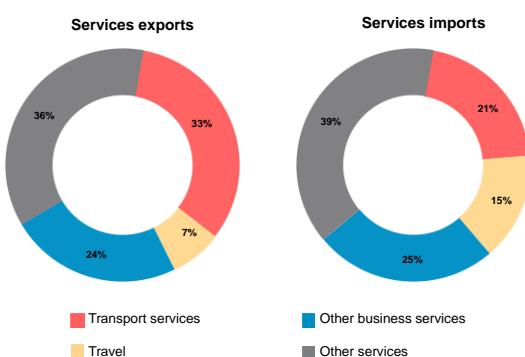

or by 17.0%. The value of transport services provided by foreign companies expanded to \$15.8 billion from \$11.8 billion. Imports of services under the 'Travel' item increased to \$11.4 billion from \$9.1 billion a year ago thanks to a partial recovery in the number of Russian individuals who travelled abroad. The value of other services received went up to \$48.3 billion vs \$43.5 billion in 2020.

Compensation of employees recorded a \$0.2 billion surplus (\$1.0 billion deficit in 2020). In 2021, compensation of employees payable to non-residents decreased to \$3.7 billion from \$4.7 billion in 2020 as a result of the reduction in the number of labour migrants temporarily employed in the Russian economy. Compensation of employees received by Russian individuals working abroad rose to \$3.9 billion in 2021 from \$3.7 billion a year ago.

In 2021, the deficit in the **balance of investment income** expanded to \$43.5 billion from \$34.1 billion a year earlier. The deficit of the private sector's investment income (banks and other sectors) totalled \$42.5 billion against \$33.2 billion a year before. This was conditional on the better financial performance of Russian corporations resulting in higher incomes accrued and payable to non-residents. The overall balance of investment income of general government and the central bank had a deficit of \$1.0 billion (\$0.8 billion deficit in 2020).

The deficit in the **balance of secondary income** reduced to \$5.0 billion, or by 20.6%, compared to 2020 in part due to larger dividend tax payments received from non-residents.

COMPOSITION OF SERVICES EXPORTS AND IMPORTS IN 2021

The **capital account** had a deficit of \$0.3 billion, with the 2020 negative balance of \$0.5 billion.

Net lending to the rest of the world (the combined balances on the current and capital accounts) amounted to \$121.7 billion in 2021 (\$35.5 billion a year earlier).

The surplus of financial account (excluding reserve assets) totalled \$59.3 billion (\$53.1 billion in 2020) driven by the accumulation of residents' foreign assets.

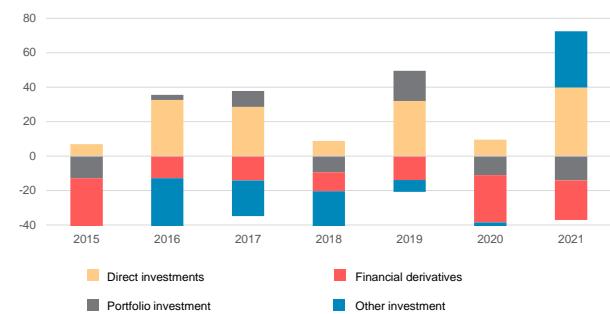

External liabilities expanded by \$35.4 billion (\$39.9 billion drop in 2020).

Foreign liabilities of general government declined by \$3.8 billion offsetting their \$3.7 billion rise in 2020. This decline was due to net sales of sovereign securities by non-residents.

The **central bank's** liabilities to non-residents rose by \$22.0 billion (\$1.0 billion drop in 2020) due to the allocation of Special Drawing Rights (SDR) holdings to the Russian Federation within the framework of the IMF's decision.

The increase in the external liabilities of *private sector*¹ to the rest of the world totalled \$17.2 billion in 2021 (\$42.6 billion decrease a year before).

NET ACQUISITION OF FINANCIAL ASSETS BY RESIDENTS, NET OF RESERVE ASSETS, BY INVESTMENT CATEGORY IN 2015–2021
billions of US dollars

¹ denotes a net decrease in residents' foreign assets.

¹ Total amount of operations of banks and other sectors.

Banks' liabilities to non-residents declined by \$9.9 billion (\$26.2 billion in 2020). As in 2020, changes in the external liabilities of the sector were impacted by derivatives transactions.

Foreign liabilities of *other* sectors increased by \$27.0 billion (\$16.4 billion decline in 2020). Direct investment liabilities to non-residents were up by \$36.8 billion (\$8.0 billion in 2020), whereas portfolio investment liabilities and liabilities in the form of loans were down by \$9.6 billion and \$11.0 billion (\$15.3 billion and \$9.3 billion in 2020), respectively.

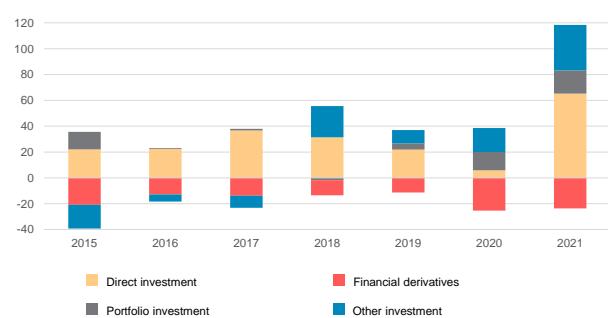

In 2021, **financial assets (excluding reserve assets)** grew by \$94.7 billion (\$13.1 billion in 2020).

Total foreign claims of *general government and the central bank* rose by \$3.6 billion (\$1.5 billion a year before), mostly due to the issue of new loans.

In 2021, foreign assets of *the private sector* increased by \$90.8 billion (by \$11.5 billion in 2020).

Foreign assets of banks reduced by \$4.0 billion (by \$4.5 billion in 2020). Similar to liabilities, this drop greatly resulted from the derivatives transactions.

NET INCURRENCE OF LIABILITIES BY RESIDENTS BY INVESTMENT CATEGORY IN 2015–2021
billions of US dollars

¹ denotes a net decrease in residents' foreign assets.

External claims of other sectors² expanded by \$94.8 billion (by \$16.0 billion in 2020). In contrast to 2020, when investment in foreign securities was dominating in Russian investor portfolios, growth in direct investment became the key factor in the reporting period. In 2021, the value of direct investment abroad rose by \$64.6 billion (by \$5.7 billion a year before), with a \$14.0 billion increase in portfolio investment (by \$11.9 billion). There was a considerable increase in other assets in part due to the issue of trade credit and advances, as well as funds placed by business and

household funds on current accounts and deposits abroad. Due to the restricted foreign travel of Russian people, the reduction in the amount of cash foreign currency generated by the transactions of other sectors with non-residents, stayed at the 2020 level totalling \$1.8 billion.

The positive **balance on financial transactions of the private sector** in 2021 reached \$72.6 billion as compared to \$50.3 billion in 2020. Net lending to the rest of the world was primarily ensured through building up foreign assets by other sectors.

INTERNATIONAL RESERVES OF THE RUSSIAN FEDERATION

In 2021, **international reserves** of the Russian Federation increased by \$34.9 billion to \$630.6 billion as of 1 January 2022.

In the indicator's change structure, a \$63.5 billion growth in the international reserves resulting from the transactions recorded in the balance of payments, was above the negative revaluation of \$24.2 billion following the depreciation of assets denominated in foreign currencies other than US dollar and gold price downturn. The negative value of other changes was \$4.5 billion.

As of 1 January 2022, the value of

monetary gold totalled \$133.1 billion. A \$5.7 billion drop in gold reserve over 2021 was caused by the negative revaluation. A moderate increase in holdings in physical terms was ensured through a gold purchase by the Ministry of Finance of the Russian Federation surpassing the sales of gold coins. As a result, the share of gold in the international reserves decreased from 23.3% to 21.1% over the year.

As of 1 January 2022, the amount of international reserves was sufficient to finance imports of goods and services for 20 months.

INTERNATIONAL INVESTMENT POSITION OF THE RUSSIAN FEDERATION

As of 1 January 2022, Russia's total **foreign assets** stood at \$1,648.2 billion

demonstrating an increase by 5.1% or \$79.3 billion over 2021.

² Net of debt for supplies under intergovernmental agreements.

Claims on non-residents were up by \$158.2 billion due to transactions reflected in the balance of payments. The negative revaluation of foreign assets accounted for \$71.9 billion. It was conditional on, among other things, a lower US dollar equivalent of instruments denominated in foreign currencies other than the US dollar, as well as gold price downturn. The negative value of other changes of \$7.0 billion was predominantly impacted by the reclassification of redomiciled companies' direct investment.

In the structure of financial instruments, external assets in the form of direct investments rose by \$15.2 billion to \$487.1 billion mainly due to the accumulation of equity claims on non-residents. Portfolio investment abroad increased by \$9.5 billion and amounted to \$117.4 billion as of 1 January 2022. The said changes were based on the investment in equity instruments with a decrease in investment in debt instruments following negative revaluations. Other investment expanded by \$20.0 billion to \$406.7 billion. This was mainly conditioned on the issue of loans to non-residents, including trade credits, as well as on the purchases of cash foreign currency and the funds placed on deposits by residents abroad.

CHANGES IN INTERNATIONAL INVESTMENT POSITION IN 2020-2021
billions of US dollars

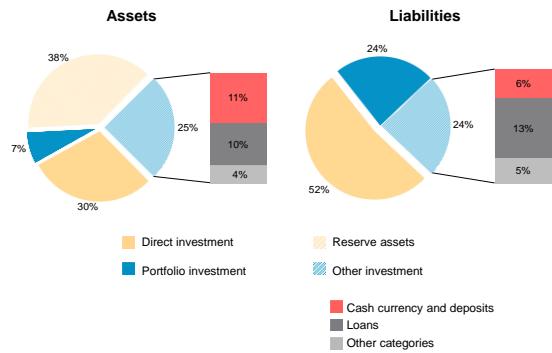

External liabilities of the Russian Federation increased by \$112.9 billion to \$1,164.7 billion mainly fuelled by the positive revaluations of \$81.3 billion resulting from the higher quotes of financial instruments issued by Russian companies. Foreign liabilities were up by \$35.4 billion due to transactions recorded in the balance of payments. The negative value of other changes was \$3.7 billion.

The pro rata contributions made by the revaluations and transactions recorded in the balance of payments secured a \$69.9 billion growth in direct investment in the Russian Federation up to \$609.6 billion. Portfolio investment liabilities rose by \$17.9 billion to \$273.9 billion largely driven by the positive revaluations of equity instruments held by non-residents. Debt under other investment expanded by \$27.6 billion to \$275.5 billion. This increase was mainly prompted by the allocation of SDR holdings to Russia by IMF.

A more appreciable rise in the external liabilities than that in the foreign assets made the **net positive international investment position** of the Russian Federation change from \$517.1 billion as of early 2021, to \$483.4 billion as of 1 January 2022.

COMPOSITION OF INTERNATIONAL INVESTMENT POSITION AS OF 31 DECEMBER 2021

EXTERNAL DEBT OF THE RUSSIAN FEDERATION

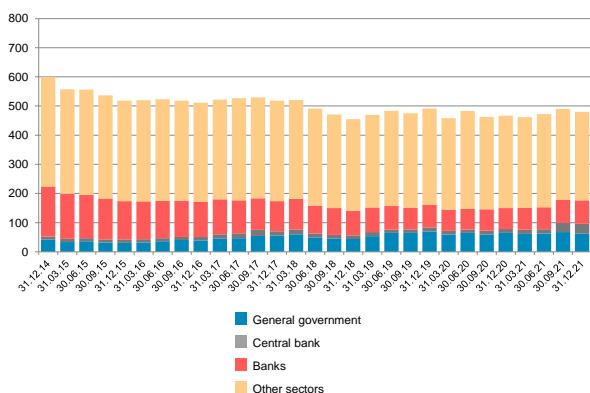

As of 1 January 2022, the **external debt** of the Russian Federation totalled \$480.0 billion, having increased by \$12.9 billion, or by 2.8%, over the year. A \$27.4 billion increase in debt owing to transactions with non-residents was partially offset by the negative exchange rate and price revaluations in the amount of \$9.1 billion and other changes amounting to \$5.3 billion.

External debt of general government reduced by \$3.0 billion to \$62.1 billion due to a drop in non-residents' investment in sovereign securities denominated in both Russian rubles (by \$1.7 billion) and foreign currency (by \$1.1 billion).

A \$21.4 billion rise in the liabilities of central bank to non-residents up to \$34.3 billion was primarily associated with the SDR allocation to the Russian Federation under the relevant IMF decision.

Banks' external debt increased by \$8.3 billion to \$80.4 billion as larger amounts of non-residents' funds were placed on current accounts and deposits, including through interbank transactions.

EXTERNAL DEBT OF THE RUSSIAN FEDERATION
billions of US dollars

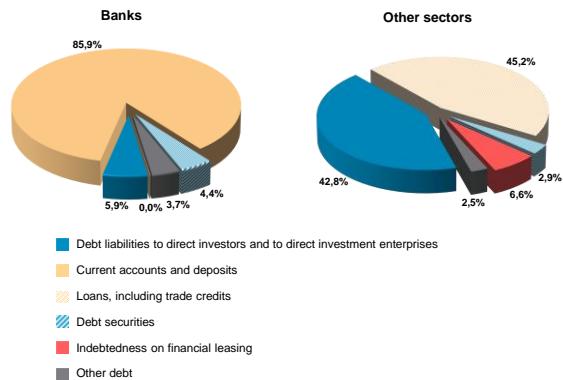

External liabilities of other sectors decreased by \$13.7 billion to \$303.2 billion demonstrating diverse trends in individual debt categories: a decline in loan and deposit debts, including those under direct investment, was in part offset by rising liabilities under other financial instruments, including financial leasing and trade credits.

Over 2021, the share of short-term debt (of \$85.9 billion as of 1 January 2022) in the total external debt expanded to 17.9% due in part to the segment of banks' external liabilities in the form of current accounts and demand deposits as well as short-term debt of non-financial organisations. The share of long-term liabilities declined to 82.1% (\$394.1 billion) accordingly.

External debt denominated in Russian rubles rose by \$4.4 billion to \$132.5 billion. As a result, the share of ruble-denominated debt changed from 27.4% to 27.6% since the beginning of the year. The value of debt liabilities denominated in foreign currency increased by \$8.5 billion to \$347.4 billion, which was mainly caused by the expansion of external debt of the central bank.

BANKS' AND OTHER SECTORS' EXTERNAL DEBT COMPOSITION
AS OF DECEMBER 31, 2021

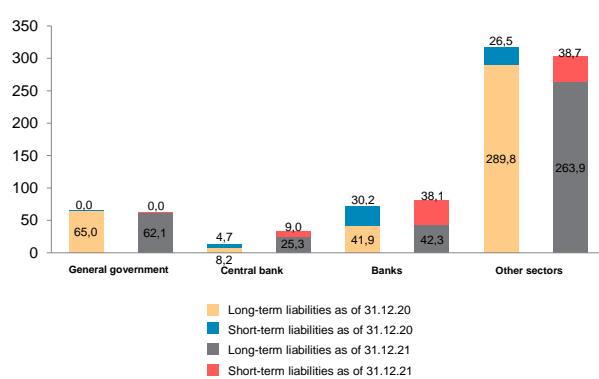

The share of FX-denominated debt reduced from 72.6% to 72.4% since the beginning of the year.

As of 1 January 2022, according to the international criteria, the debt burden on the Russian economy remained moderate with the

external debt-to-GDP ratio amounting to 27.0% (31.4% as of 2021 year-beginning), while the ratio of the general government's external debt liabilities to GDP came in at 3.5% (4.4% as of 2021 year-beginning).

Table 1.1

Balance of Payments of the Russian Federation in 2021

Standard Components

The presentation of Russia's balance of payments data is prepared by the Bank of Russia in accordance with the listing of standard components recommended in the 6th edition of the IMF's Balance of Payment and International Investment Position Manual (BPM6) and is used to report country's data to the IMF.

Some standard components are either insignificant given the scale of the Russian Federation or beyond the scope of collected data.

The standard BPM6 presentation employs a commonly accepted use of the mathematical signs "+" and "-" to denote respectively net increase and net decrease of financial assets and liabilities. The negative sign is not used in the current and capital accounts for representing imports of goods and services, as well as primary and secondary income payable and capital transfers payable.

The sum of the balances on the current and capital accounts represents the net lending "+" or net borrowing "-" by the economy with the rest of the world. This is conceptually equal to the net balance on the financial account. The residual difference between the sum of net lending/net borrowing derived from the financial account, on one hand, and the same item derived from the current and capital accounts, on the other, is stated in the balance of payments as net errors and omissions item.

Reserve assets are presented as standard components of the financial account.

¹ In order to harmonize the presentation of the Balance of Payments (BOP) and the International Investment Position (IIP) the data on foreign currency in the BOP does not include transactions between residents recorded under Other changes in the IIP.

² Includes fictitious transactions related to foreign trade in goods and services, securities trading, lending to nonresidents and fictitious transactions with money transfers to residents' accounts abroad, which purpose is cross-border money transfer.

Table 1.4

¹ The indebtedness on supplies of goods according to intergovernmental agreements is excluded.

² The item "Net errors and omissions" entirely relates to the other sectors. It could be explained by the fact that most noticeable difficulties arise upon the recording of financial transactions undertaken by these sectors in the balance of payments.

Commentary.

International reserves (reserve assets) of the Russian Federation are highly liquid external assets that are readily available to the Bank of Russia and the Government of the Russian Federation.

International reserves consist of monetary gold, special drawing rights (SDR) holdings, reserve position in the International Monetary Fund (IMF, Fund), and other reserve assets.

Monetary gold is defined as standard gold bars and coins with a purity of at least 995/1,000 held by the Bank of Russia and the Government of the Russian Federation. It comprises gold in vault, en route and in allocated accounts, including those that are held abroad.

Special drawing rights are international reserve assets created by the IMF and allocated to members; included are balances of SDR holdings on the account of the Russian Federation in the Fund's SDR Department.

Reserve position in the IMF is the sum of the reserve tranche position (representing foreign exchange component of the quota of the Russian Federation in the Fund) and the country's claims on the IMF arising from lending under the New Arrangements to Borrow.

Other reserve assets include foreign currency; balances on nostro corresponding accounts including unallocated gold accounts; deposits with the initial maturity of up to 1 year including gold deposits with foreign central banks, the Bank for International Settlements (BIS) and nonresident deposit-taking corporations; debt securities issued by nonresidents; loans extended under reverse repo agreements, and other financial claims on nonresidents with the initial maturity of up to 1 year.

Funds received under repos with nonresidents are shown as an increase in Other reserve assets.

Securities provided to counterparties under securities' lending transactions are recorded in international reserves, whereas securities that serve as collateral under repurchase agreements are excluded therefrom.

Part of resources on accounts of the Reserve Fund and of the National Wealth Fund of the Russian Federation which is denominated in foreign currency, deposited with the Bank of Russia and further invested by the Bank of Russia in foreign financial assets is included in the international reserves of the Russian Federation.

Foreign exchange-denominated claims of the Bank of Russia and of the Government of the Russian Federation on residents are not included in the international reserves of the Russian Federation.

Transactions are recorded as of the value date with interest accrued.

Notes.

The difference between External Debt data, International Investment Position and Balance of Payments data is due to the fact that External Debt statistics for General government and Other sectors record financial instruments at face value, while transactions' data do not include accrued interest and coupon values.

Data on Banks includes State Development Corporation VEB.RF.

List of Main Changes to the Balance of Payments of the Russian Federation over previous periods

The table below contains the changes/updates to historical data used in the publication of the balance of payments of the Russian Federation for 2021 and indicates their reasons using the following codes:

- RD means changes in reported data used to compile the balance of payments;
- M means an improvement of the balance of payment methodology and/or methods for calculating and measuring certain items;
- NDS means new data sources related to non-resident transactions previously unaccounted (or accounted based on other information);
- DEA means double-entry adjustments in the balance of payments;
- DER means data estimates replacement related to the data, the actual preparation period of which goes beyond the balance of payment release date;
- RI means reclassification of instruments (items) leading to changes in data;
- O means other.

Standard component items	Period	Reason for change code
General merchandise on a balance of payments basis	2021 Q1 – Q3	RD, RI
Net exports of goods under merchanting (goods acquired / goods sold abroad under merchanting)	2021 Q1 – Q3	RD, RI
Maintenance and repair services - credit - debit	2021 Q2 2021 Q3	RD RD
Transport – sea transport – passenger (debit)	2020 Q1, 2020 Q2, 2020 Q4 2021 Q3	M M RD, M
Transport – sea transport – freight (debit)	2019 Q1 – 2020 Q4 2021 Q1 – Q3	M RD, M
Transport – sea transport – other (debit)	2019 Q1 – 2020 Q4 2021 Q1 – Q3	M RD, M
Transport – air transport, other modes of transport - passenger (debit) - freight (debit) - other (debit)	2021 Q1 – Q3 2021 Q1 – Q3 2020 Q1 – Q4 2021 Q1 – Q3	RD, M RD, M M RD, M
Travel – business - credit - debit	2021 Q1 – Q3 2021 Q1 – Q3	RD RD
Travel – personal - credit - debit	2020 Q1 – Q4 2021 Q1 – Q3 2021 Q1 – Q3	NDS RD RD
Construction – construction abroad (credit)	2021 Q1 – Q3	RD
Construction – construction in the territory of Russia (debit)	2021 Q1 – Q3	RD

Standard component items	Period	Reason for change code
Telecommunication, computer and information services: – computer services (debit)	2021 Q1 – Q3	RD
Other business services – professional and management consulting services - credit - debit	2021 Q2 – Q3 2021 Q2 – Q3	RD RD
Other business services – technical, trade-related, and other business services - credit - debit	2021 Q2 – Q3 2021 Q1 – Q3	RD RD
